

Productivity in Research

Working Abroad in Higher Education:
If only I knew?

Dr. Michael Clarke

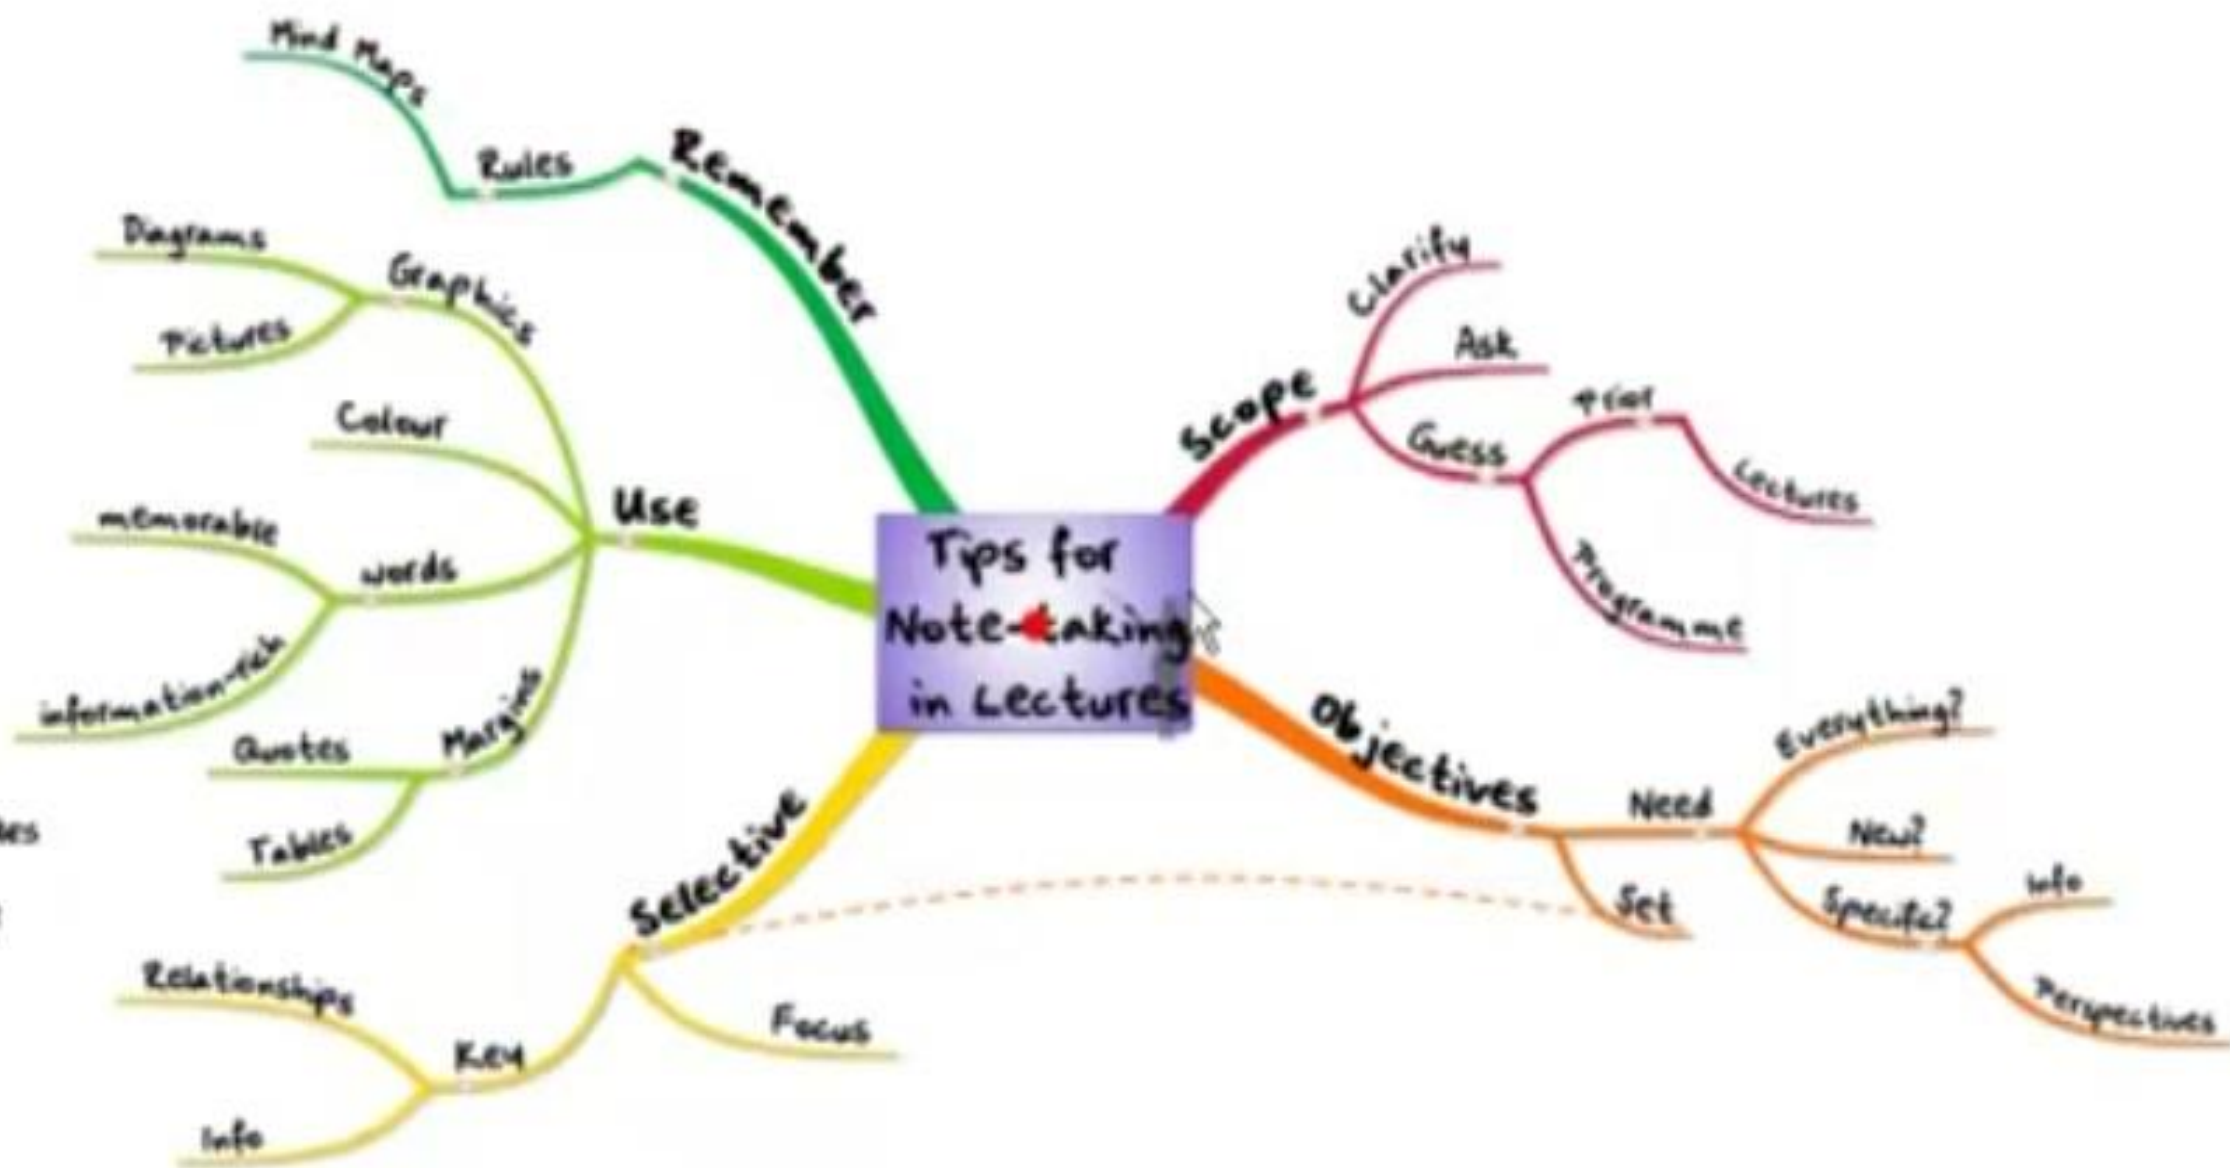

Productivity in Research

Aims of Workshop

1. Give you some hints and tips on how to be productive in your journey to complete your own project.
2. Always keep the end goal in sight. Very important to frame your research question(s).
3. Literature chapter is the most important ingredient in your project – research gap, research question, questionnaires etc come from it.
4. Leave Chapter One and Abstract to the last – took me three hours to complete!!

Productivity in Research

- Mind Mapping – used in any Chapter is a highly productive technique to save you time!!!
- Be critical in your literature review.
- Summarise your literature review and try to develop comparisons where possible.
- Methodology Chapter
 - The questionnaire.
- Some hints on qualitative and quantitative research
 - Sample of findings.
 - Quantifying qualitative research.
- Make sure you review your literature and compare in your findings, Discussion and Conclusion chapters.
